

INGREDIENTS TO AVOID

If you're wanting to start your low-tox journey, I'm here to help! My mission is to help make the process less overwhelming and as easy as possible to navigate.

Remember to give yourself grace as I know there are a lot of ingredients on here. Even downloading this is a step in the right direction. Feel free to screenshot or print to take with you when you go shopping. You got this ♡

INGREDIENTS TO AVOID: BEAUTY & PERSONAL CARE

- Aluminum
- Acrylates
- Avobenzone
- Benzalkonium Chloride
- Benzophenone
- Benzene
- Benzyl Benzoate
- Benzyl Salicylate
- Butylated Hydroxyanisole (BHA)
- Butylated Hydroxytoluene (BHT)
- Cetearith (10, 30, etc.)
- Chlorphenesin
- Chloroxylene
- Cocamidopropyl Hydroxysultaine
- Cyclopentasiloxane
- Diethanolamine (DEA)
- Disodium EDTA
- Ethanolamine
- Ethylene Glycol
- Ethylhexyl Methoxycinnamate
- Formaldehyde & it's releasing preservatives:
 - Diazolidinyl Urea
 - Quaternium-15
- Homosalate
- Hydroquinone
- Isoceteth (2, 10, etc.)
- Lake Dyes (unless brand does heavy metal testing)
- Laureth (4,9, etc.)
- Lauramidopropyl Betaine
- Methylisothiazolinone (MIT)
- Methylchloroisothiazolinone (MCI)
- Mineral Oil
- Octinoxate
- Octocrylene
- Oxybenzone
- Paraben (Methyl, Butyl, etc.)
- Paraffin
- Petrolatum
- Petroleum
- Phthalates
- Polyacrylamide
- Polyethelene Glycol (PEG)
- Polysorbate (20, 60, etc.)
- Polytetrafluoroethylene (PTFE)
- Polyaminopropyl Biguanide (PAPB)
- Polyquaternium (10,7, etc.)
- Steareth (20, 21, etc.)
- Sodium Lauroyl Sarcosinate
- Talc
- TBHQ
- Toluene
- Trideceth (10, 30, etc.)
- Triclocarban
- Triolosan
- Triethanolamine (TEA)

NOTE:

- **Phenoxyethanol:** When the brand isn't transparent with how it's derived, it could potentially be contaminated with 1,4 Dioxane. Check to see if the brand states it is derived from green tea instead ✓
- **Cocamidopropyl Betaine:** When the brand isn't transparent with how it's derived, it could potentially be contaminated with Nitrosamines. Check to see if the brand states it is derived from coconut instead ✓
- **Fragrance/Parfum/Flavor** - Remember: "Fragrance" is an umbrella term. When the brand isn't transparent with what ingredients their fragrance is made of, it can contain thousands of chemicals that the company doesn't have to disclose. Look for transparency on the label or company's website instead ✓
- **Titanium Dioxide** - Can be toxic depending on how it's used or if inhaled. I personally avoid in products such as loose powder, aerosol, and in sensitive areas such as period care.

Tip: if you love a brand, it might be worth emailing them just to clarify :)
